

Schengen the New Iron Curtain (2007)

On 21st December 2007 Hungary became practically part of the Schengen area. Since the national catastrophe i.e. Peace Dictate Trianon on 4th June 1920 Hungary borders on herself as the consequence of dismemberment. As a result ethnic Hungarians are living in large numbers in all Successor States. Separated Hungarians' living conditions are however influenced not only by the economical (under)development of any country in question but they are afflicted with political plague i.e. every day hostilities although at a different intensity. (According to Tacitus "We hate whom we hurt". e.g. Benes decrees still in force.) Now how can Hungarians, family members and relatives, friends and associations, societies, charities and churches keep in touch beyond the Schengen-borders requiring now very expensive Visa?

Some more points to ponder, as follows.

1. Why has the Government of Hungary joined to the Schengen zone when they have known that it would further separate Hungarians?
2. Why have the Parliamentary Opposition Parties of Hungary supported the introduction of the Schengen requirements when they have known that it would further separate Hungarians?
3. Why has not the Government of Hungary required derogation at the EU concerning Hungarians living in visa (Successor) States?
4. Why has the EU required Hungary to join to the Schengen zone when they have known that it would further separate Hungarians?
5. Why is the EU suspected of doing so? "The problem, is that in this part of the world a large number of communists have, by changing their colors marginally, ended up even more powerful. And all with the blessing if not the active connivance of the West!" (E.g. Johnathan Sunley a British business consultant based in Budapest; source: <http://www.posthuman.hu/dokumentum/radics/kapi%20komm.doc> /21. December 2007/)
6. Why Ex-Communists Hold The Power In East Europe? (Mitchell, Brian /2002/ Investor's Business Daily, June 25)
7. Why has even "The Economist"¹ referred to the joining conditions² of the Accession Countries – among them Hungary too – as their "rotten financial deals"?
8. Does Hungarian nation's interest harm any human rights that every people of the separated one third of the Hungarian nation living since Trianon within the

² The enlargement agreed at Copenhagen on 12-13 December 2002.

borders of all neighbouring states (Successor States) also want to keep in touch with the whole of the Hungarian nation?

9. What's going on? (Cp. Koch, Stephen /2004/ Double Lives, Stalin, Willi Münzberg and the Seduction of the Intellectuals. And now their present spiritual heirs like Lionel Jospin, Joschka Fischer, Gerhard Schröder, Romano Prodi, Tony Blair, Horn Gyula, Gyurcsány Ferenc, Aleksander Kwaśniewski, Ion Iliescu, Vladimir Meciar etc.)
